

CLEARVIEW STOVES SPARES - SOLUTION 400 & OVEN

Below is a list of common spares that you may need to replace at some point. We keep all spares for all stoves in stock at all times. When ordering spares it is helpful to quote the part number and your stove Warranty Registration Number (WRN) which can be found on your operating instructions or on the data plate fixed to the rear of your stove (under the rear casing).

Our spares are unique to us and our stoves and are made to a very specific design and standard. Using copies or non-Clearview components will void the guarantee on your stove and may limit your stove performance. Often the life of other parts will also be shortened.

STOVE KITS
